1. In the town of Kuntsevo (5544N-3726E) there is Zavod 304 plant belonging to the Ministry of Armaments. Prior to and during World War II this plant manufactured machine guns, ammunition and other equipment. At the present time, it conducts research work, manufactures and tests machine guns and other weapons. The Nauchno-Issledovatel'skiy Institut No 20 (NII-20 - Scientific Research Institute No 20), charged with research work on weapons and equipment, is a part of this plant. There are also some members of the Communist Party Central Committee attached to this plant for duty, presumably to ensure strict security and control measures. The plant is heavily guarded.

the Zavod 304 was conducting research work and manufacturing gun-laying radar sets. One of the research tasks mentioned was to reduce the size of radar sets. Several times in 1949, although at a considerable distance, [ ] these gun-laying radar sets leaving the plant's grounds and being driven to an adjoining field for practical work or tests. This happened usually once a month and the sets were left at the field for approximately a week. These sets were composed of a covered truck and a two-wheeled trailer, both winterized. [ ] neither the

truck nor the trailer had any installations or equipment on their roofs when they left the plant. When they drove to the field, a collapsible antenna assembly was taken out of the truck and erected on the ground. This antenna had a height of approximately 30-50 meters. On its roof the trailer put up a piece of equipment consisting of four revolving screens in the form of a cross (in a horizontal projection). With this piece of equipment set up the trailer looked similar to a PUAZO-3 set.
